

WHO IS THE IJS TEAM?

Our team is experienced in locating and acquiring both new and used aircraft and helicopters. We have long standing relationships with aircraft sellers, aircraft manufacturers and maintenance providers.

The IJS team is highly experienced in managing aircraft and helicopters through interior modifications, avionics upgrades, repaint and major inspections. We are uniquely qualified aviation consultants that can assist with many aspects of aircraft acquisitions such as import/export and maintenance review. We fully understand the importance of attention to details that our clients require.

The IJS legal team and transaction specialist can handle all phases of contract negotiations, purchase & sales agreements, international registration documentation and closing documents.

Each client has a unique aviation requirement. Those requirements are best understood by an organization with years of actual operational experience. IJS can provide a complete "aviation needs analysis" to more accurately assist our clients with their aircraft selection process. The analysis will consider current operational usage. Our operational experience in business and airliner operations offers our clients the highest levels of accuracy in fleet planning.

AIRCRAFT SALES & ACQUISITIONS

IJS is More Than Just a Broker

If you or your organization is looking to purchase a new or pre-owned aircraft, International Jet Support, with our decades of proven experience and longstanding industry relationships, set us apart from our competition.

Being more than just a broker is not a slogan for International Jet Support, it's a process. IJS implements a three step process that enables us to select the appropriate aircraft for your travel requirements and budget.

First, our Aviation Analysis Team will thoroughly evaluate your frequency of travel, lifestyle and travel destinations to select the aircraft that will support your travel requirements. However, IJS does not stop there. IJS then employs a Business Aviation Analysis that will further validate the selection process from a fiduciary perspective and provide direction on the type of purchase that should be utilized.

Our network of relationships, including membership in the National Aircraft Resale Association (NARA) provides IJS with access to aircraft that are not advertised.

Hardest Working Agents in the Business

If you are in the market to sell your aircraft, the IJS team of agents will leverage the virtues and competitive strengths against similar aircraft on the market. Our tireless efforts result in clients receiving the highest possible price in the shortest possible time for their aircraft. Our sophisticated knowledge of the marketplace and our hard-earned respect in the aviation community provides IJS access to the perfect buyer!

Unmatched After-Sales Support

International Jet Support is unmatched for its after-sales support. Unlike traditional aircraft brokers, IJS is uniquely structured to keep you flying even when your aircraft is in for maintenance. We have a staff of pilots who can pick-up and deliver your aircraft virtually anywhere in the world. Our extensive aircraft parts and avionics inventory provides our customers with rapid access to replacement components. We also operate a 24/7/365 emergency service desk for any unexpected private air travel issues that customers encounter.

AIRCRAFT PARTS

Global Supplier of Aircraft Parts

Headquartered in Farmingdale, NY, U.S.A, International Jet Support (IJS) is a worldwide supplier of aircraft parts and aviation services to airlines, aircraft operators, airframe manufacturers and MRO (Maintenance Repair & Overhaul) operations. International Jet Support acquires parts from multiple parts sources to obtain the highest quality product at the most competitive pricing. These longstanding relationships that International Jet Support has developed, has afforded International Jet Support with the luxury of an established discount program. Utilizing our highly trained staff with extensive experience in the aviation industry and state of the art of technology, International Jet Support maintains an extensive inventory of aircraft parts under the most stringent quality management system. All aircraft parts for sale are acquired or consigned through the OEM's, Airlines or FAA certified repair facilities and have complete certification and traceable documentation.

At International Jet Support, our goal is to be your valued aviation supply partner offering superior aviation product and 24/7 parts accessibility, thousands of airframe parts and accessories, aircraft engine parts, landing gear components, aircraft avionics, flight controls, aircraft lights and more. Whether you are looking to purchase your required airplane parts or would like to use our aviation parts seller services to sell your aircraft parts, we guarantee the highest level of service and support available in the industry.

AVIATION SUPPORT

“Support is in our name, it is who we are”

- Complete understanding of and total respect for the needs of our customers.
- Service that exceeds domestic and international standards.
- Integrity to customers, suppliers and vendors that builds trust and relationships.
- Dedication to safety and reliability.
- Commitment to the partnership between International Jet Support and their customers.

Commitment to Service & AOG Support

Our loyal customer base can be attributed to our focus on professional and courteous customer service, which includes total parts support, 24 hour AOG support, an Aviation Analysis Team and a business aviation analysis process. Our approach is tailored to fit the needs of each individual customer and we are continuously searching methods to improve our efficiency and productivity. This constant drive to improve our performance allows IJS to pass along cost savings to our customers while maintaining the quality of our products and service.

Quality Products

Aviation is first and foremost about safety and reliability. We ensure that our parts have full traceability documentation and certificates. If you require parts that we do not have in stock, our strong relationships with manufacturers provides IJS access to parts and delivery within a short timeframe.

Everything From a Single Source

Having one contact for your aviation needs reduces complexity, time and ultimately cost. International Jet Support is the answer to all your aviation needs. International Jet Support will cover the entire span of an aircraft. IJS provides technical support, parts supply, purchasing of an aircraft and more. IJS is where you are, 24/7 to “support” your aviation needs.
